SUMMARY

Self-driven full stack developer who designed, built, and shipped a production SaaS product solo in under two weeks. Moriqa is a browser-based AI image editor — live at moriqa.com — with auth, cloud storage, AI tooling, and payments. Proficient in leveraging AI tools (Claude, OpenAI Codex) to ship fast without sacrificing code quality. Passionate about building real products and exploring new domains — from AI-powered web tools to game development.

PROJECTS

Moriqa — Browser-Based AI Image Editor

moriqa.com

React · TypeScript · Fabric.js · Zustand · Supabase · Clerk · Vercel Functions · Replicate · Paddle

- Designed and built a fully browser-based Photoshop-alternative solo — shipped to production in under two weeks.
- Integrated 4 AI tools: background removal, object removal, image colorization, and 4× AI upscaling via Replicate API.
- Implemented production-ready auth with Clerk: Google, GitHub, Discord, and email/password with trusted-origin allowlisting.
- Architected Moriqa Cloud: .mori files in Vercel Blob, metadata in Supabase, with autosave for Pro users.
- Integrated Paddle for Pro subscriptions and cross-border payment processing.
- Shipped full editing suite: layers, blend modes, folders, Magic Wand/Lasso/Marquee, shapes, text, filters, rulers, guides, and 6 export formats.

Co-op Horror Game Prototype — Unreal Engine · Blueprints

[Demo on YouTube](#)

- Built a multiplayer co-op horror game prototype using Unreal Engine Blueprints — no prior game development experience.
- Implemented core gameplay mechanics, player synchronization, and atmospheric horror elements.
